FCC compliance statement:

1.This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.
2.Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.

12

ISED Notice

This device contains licence-exempt transmitters(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:
(1)This device may not cause interference.
(2)This device must accept any interference, including interference that may cause undesired operation of the device.
This Class B digital apparatus complies with Canadian ICES-003(B). This device complies with RSS-247 of Industry Canada. Operation is subject to the condition that this device does not cause harmful interference

ISED Radiation Exposure Statement This equipment complies with ISED radiation exposure limits setforth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 20 cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter

14

For CE Frequency

4CHR3:
Operation frequency Range: 2412-2472MHz Wi-Fi: 2.4G≤20dBm

4CHPROR3:
Operation frequency Range: 2412-2472MHz,433.92MHz (Receive Only) Wi-Fi: 2.4G≤20dBm

EU Declaration of Conformity

Hereby, Shenzhen Sonoff Technologies Co., Ltd. declares that the radio equipment type 4CHR3/4CHPROR3 is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: https://sonoff.tech/compliance/

Warning

Under normal use of condition, this equipment should be kept a separation distance of at least 20 cm between the antenna and the body of the user.

WEEE Disposal and Recycling Information

All products bearing this symbol are waste electrical and electronic equipment (WEEE as in directive 2012/19/EU) which should not be mixed with unsorted household waste. Instead, you should protect human health and the environment by handing over your waste equipment to a designated collection point for the recycling of waste electrical and electronic equipment, appointed by the government or local authorities. Correct disposal and recycling will help prevent potential negative consequences to the environment and human health. Please contact the installer or local authorities for more information about the location as well as terms and conditions of such collection points.

To ensure the safety of your electrical installation, it's essential either a Miniature Circuit Breaker (MCB) or a Residual Current Operated Circuit Breaker (RCBO) with an electrical rating of 4CHR3(16A), 4CHR3PRO(40A) has been installed before the 4CHR3, 4CHR3PRO.

Environmental Protection

The product complies with the requirements of the so-called New Approach Directives of the European Union (EU),
which relate to issues concerning user safety, health protection, and environmental protection. These directives define the risks that must be identified and eliminated.

Maintenance

The product must be maintained (cleaned) regularly either by the user or by specialized service centers, at the user's own expense and responsibility. If the user manual does not specify required maintenance, cleaning, or service intervals, the physical condition of the product should be assessed at least once a week for any deviations from that of a new product. If any deviation is detected or observed, immediate maintenance (cleaning) or servicing must be carried out. Failure to maintain (clean) the product properly and respond when a deviation is identified may result in permanent damage to the product. The manufacturer is not liable for damage caused by negligence.

15

Safety Precautions

- Before switching on, ensure that the device's contacts are clean.
- Do not leave the device unattended while in use.
- Make sure that the device can be quickly disconnected from the power source in case of an emergency.
- Never expose the device to high temperatures.
- Keep the device in a dry and well-ventilated area, away from flammable materials and other objects.
- Never cover the device while it is turned on.
- Never use a power supply, charging station, cables, etc., without the manufacturer's recommendation and certification.
- The device may contain cells that are difficult to extinguish—equip yourself with a fire blanket.
